

SideKick

Stress test - capacitive imbalances / crosses / grounds

OK = 0-20    marginal 20-30

leakage test - Uses 135 VDC to punch through the oxide layer of a fault on a dry pair  
3.3 or greater is acceptable

load coils - detects loads

resistance - in ohms

distance to open

AC / DC voltage test

Colt 250

max bit rate

Interleaved bit rate

relative capacity - relationship between max and interleaved

Noise margin - SNR

attenuation - amount of energy lost as signal travels to end

ONT lights

- power
- battery
- fail
- video
- Network
- OMI
- POTS
- ethernet
- moca

Work Codes

- 112 pole to building
- 122 pole to pole
- 212 MH to building
- 222 MH to pole
